

<b>Company</b>	HDR, Inc. Branch Office
<b>Location</b>	New Orleans, LA
<b>Size</b>	12 office suites and a break room
<b>Furniture</b>	Realize™
<b>Dealer</b>	US Business Interiors (Steelcase Dealer), Baltimore, MD

**Project Scope:** HDR is a global firm providing architecture, engineering, consulting, construction and related services hired by BP after the Deepwater Horizon oil spill. HDR is a corporate client of the US Business Interiors, a Steelcase dealer, located in the mid Atlantic region. This branch office for the customer is located in New Orleans, not in their normal service area. The dealer initially specified BBF on a small, 2 desk project for a HDR office in Daffney, Alabama because of our ability to deliver and install anywhere in the US. It went so well and the client like product that the dealer specified it again.

**Project Challenges:** : The New Orleans office needed 12 suites delivered and installed in a building where flooding from Hurricane Katrina had cause significant floor warping. The dealer selected Realize™ to meet aesthetic, price point and space requirements. The installers were fast, highly skilled, thorough and had no problem with leveling the product. They interacted professionally with the local client and the other trades who were on site, all reflecting well on the dealer. The dealer was delighted with BBF's outstanding performance!
