

Company	Luminite Product Corporation
Location	Bradford, PA
Size	10,000 square feet
Furniture	Milano, Momentum, Aspen Tables
Dealer	Millington Lockwood

Project Scope: In May, 2010, Luminite Products Corporation suffered a horrific fire that totally destroyed our main office building in Salamanca, NY, that also housed our Computer Graphics Department. All of us had a lot to deal with in the aftermath of the fire including furnishing a new facility. Office Furniture for 17 private offices (office and production areas). The Sales, Customer Service, Marketing and Computer Graphics Open Office Area required an additional 16 work stations; Two (2) Break Rooms - (office and production areas); and Three (3) Conference Rooms

Project Challenges: The Sales, Customer Service, Marketing and Computer Graphics Open Office Area was a challenge in that many individuals with varied work styles and job duties would all be occupying the same Open Office Area. We required a functional but yet similar work area for each person. The various colors of the desk top privacy screens & free standing privacy screens allowed us to also personalize each area to coordinate along with task and guest chairs.

“ The space planning service was a God-send. The time spent by Don and Greg to measure each individual office space and the open work area at our new facility and then to also meet one on one with each individual added a home town personal touch that is practically extinct these days. We could not have been more pleased with the guidance and suggestions for the layout of each space.”

— Pamela Zimbardi, Coordinator

a better idea.
